

MoU between Giles Brooker Group, New Zealand and BIT

Giles Brooker Group (GBG), New Zealand and BIT entered an MoU on 23 September 2014 to promote international understanding and cooperation with regard to education, research, and community development. The departments of Biotechnology, Aeronautical Engineering, Computer Science & Engineering, and English have been identified for potential collaboration and promotion of activities.

- Collaborative development of programmes
- Development of international study pathways for students
- Identification and facilitation of collaborative opportunities with other institutions, including teaching and research activities
- Development of educational opportunities for staff and students
- Development and facilitation of seminars, academic meetings and conferences
